## 4 Installation

Please read the "Safety Instructions" section first!

Your washing machine automatically detects the amount of laundry placed inside when selecting a program.

While installing the product, before the first use, calibration should be done to ensure that the laundry amount is detected in the most accurate way.

To do this, select the Drum Cleaning\* program and cancel the spin function. Start the program without laundry. Wait for the program to finish, which will take about 15 minutes.

\*The program name may vary depending on the model. For the appropriate program selection, review the program descriptions section.

- Preparation of the location and electrical, tap water and waste water installations at the place of installation is under customer's responsibility.
- Make sure that the water inlet and discharge hoses as well as the power cable are not folded, pinched or crushed while pushing the product into its place after installation or cleaning procedures.
- Prior to installation, visually check if the product has any defects on it. Do not have the product installed if it is damaged. Damaged products cause risks for your safety.

# 4.1 Appropriate Installation Location

 Place the product on a hard and level floor. Do not place it onto a carpet with high pile or other similar surfaces. Placing on an improper floor shall cause noise and vibration problems.

- Total weight of the washing machine and the dryer-with full load- when they are placed on top of each other reaches to approx. 180 kilograms. Place the product on a solid and flat floor that has sufficient load carrying capacity.
- Do not place the product on the power cable.
- Do not install the product at places where temperature may fall below 0 °C. Freezing might damage your product.
- Leave a minimum space of 1 cm between the product and the furniture.
- If you will install the product on a surface with steps, never place it close to the edge.
- Do not place the product on any platform.
- Do not place heat sources such as cooker, irons, ovens, heater etc. on the appliance and do not use them on the product.

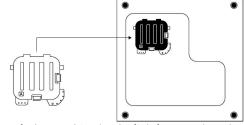

# 4.2 Assembly of Bottom Panel Covers

With some models, the base parts of the products are completely closed. These products do not have plugs and covers.

 In order to increase the sound comfort of the product, attach cover A after removing the package foam.

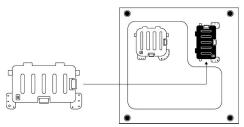

## Cover A

Tilt the machine back slightly. Rest the tabs of Cover A against the lower panel. Complete the assembly by rotating the cover.

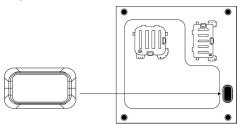

Cover B and the Cap are optional. If available, attach cover B and the Cap.

#### Cover B

Rest the tabs of Cover B against the lower panel. Complete the assembly by rotating the cover.

#### Cap

Insert the cap by pushing it with your finger.

# 4.3 Removing Transportation Safety Bolts

- Loosen all transportation safety bolts with an appropriate wrench until they turn freely.
- 2. Bend the inner part by pressing it at the grip areas and pull the part out.
- Attach the plastic covers supplied in the User Manual bag into the holes on the rear panel.

## NOTICE

Remove the transportation safety bolts before operating the product. Otherwise, the product will get damaged.

## **!**

## NOTICE

Keep the transportation safety bolts in a safe place to reuse when the product needs to be moved again in the future.

Install the transportation safety bolts in reverse order of the disassembly procedure.

Never move the product without the transportation safety bolts properly fixed in place.

## 4.4 Connecting to Water Supply

# <u>^</u>

## NOTICE

Models with a single water inlet shall not be connected to the hot water tap. In such a case the laundry will get damaged or the product will switch to protection mode and will not operate.

Do not use old or used water inlet hoses on a new product. It may cause water leakage from your machine and stain your laundry.

- 1. Tighten all hose nuts by hand. Never use a tool when tightening the nuts.
- 2. Open the taps completely after making the hose connection to check for water leaks at the connection points. If any leak occurs, turn off the tap and remove the nut. Check the gasket and tighten the nut carefully again. In order to prevent the water leaks and resultant damages, keep the taps closed when you do not use the product.
